

# SKIN FIRMING & CELLULITE SMOOTHING

Our nuFIRM EMF and RF-powered skin rejuvenation treatment combines electro-magnetic stimulation, radiofrequency energy, suction, infrared light, fat disruption technology and dynamic roller massage to lift, tighten, and smooth the skin. It targets sagging skin and cellulite while also improving circulation and skin tone.

## Fast Results

It increases the temperature of the deep skin, and the temperature of the collagen tissue will also increase. The increased temperature of collagen makes it shrink rapidly, which can quickly remove wrinkles and tighten the skin.

## New Technology

It adopts the theory of three-dimensional radio frequency system to directly penetrate the skin, and the resistance of the skin and the high friction between molecules can bring heat energy.

## Excellent Results

It is the latest treatment technology that can effectively firm sagging skin, Reduce wrinkles, improve skin elasticity and brighten skin tone.

## Treatment Feel

Most clients describe the treatment as warm, relaxing, and massage-like. The sensation may vary depending on the area treated and the settings used, but there is generally no pain or discomfort.

## BENEFITS:

- ✓ Lifts and firm sagging skin on the face and body.
- ✓ Reduces the appearance of cellulite and smooths skin texture.
- ✓ Non-invasive, with no recovery time needed.

## TREATMENT

- ✓ Skin Firming
- ✓ Fat Reduction
- ✓ Body Contouring

## RESULTS:

## WHAT TO EXPECT

Sessions typically last 30–60 minutes and feel like a warm, massage-like experience. You'll notice firmer skin and improved contours, with visible improvements developing over several weeks as collagen production is boosted.
